OUTSTANDING ACTIONS

a) Computing Support Office

The ventilation system was discussed and Dave Barratt and Dougie Williams (Estates and Buildings) provided the committee with a number of proposals which might result in added efficiency and effectiveness. These proposals included adjusting extractor/supply fan speeds, automating the opening/closing of the passive air vent on the atrium roof, closing certain floor vents/opening certain windows, reducing the temperature of the air inflow in hot weather/increasing it in cold weather, turning the heating on later, investigating why the supply fans have to run at night.

Item 3 - Room Allocation

EE reported that urgent decisions need to be made re the allocation of space in Informatics. If we take no action then we are likely to be forty desks short for PhD students scheduled to arrive in August. In three to four months we are likely to run out of Postdoc space. There is also likely to be a shortage of single occupancy offices for the Chancellors Fellows we have hired.

There was discussion about space allocation in the Forum. We need to maximise efficiency in use of the building and need to consider physical changes to the building, repurposing the space in the building, locating new space, using smaller desks, part-time/full-time use of desks and perhaps other measures. In particular, we will look at the open area on Level 4, area near room 1.16, rooms G.03, 1.45, 2.33, 5.8, 5.9, 5.10; we will make better use of visitor space; we will encourage use of Inspace for institute meetings; we will try to find a way of making better use of the “library” area; we will make more efficient use of desks allocated to people on lengthy periods of absence; and we will make more effective use of hot desking for students past their normal period of study.

Action

Discussion included PGR bench fees, the use of hot desks by interns, vacation of 5.19/use of 2.36 in lieu. The conversion of 1.45 to a PGR office would cost about £7,000 and could be completed before the start of the academic year.
