System Level Integration Practical (INFR10042_15-16_SS1_SEM1_ONLINE_CACOREINF_System Level Integration Practical) - Course Evaluation for

Learning objectives of the course were clear at the outset

The course was well organised

Assessment methods are appropriate to the course content

Marking criteria were made clear in advance

Feedback so far has been provided promptly
Feedback so far has been helpful and informative

The course has enhanced my skills and abilities

Overall I am satisfied with the quality of the course

I would recommend this course to other students

About your course -

Workshops / tutorials / computer labs for this course helped my learning

D K Arvind -

was organised and well prepared

was good at explaining things

was approachable and willing to help

stimulated my interest in the subject
What did you find most valuable about the course?

- Enhancing inter-disciplinary teamworking skills.
- Experience setting up and maintaining a server
- The course allows a great amount of freedom, which isn't offered in any other courses.
- This course has almost zero teaching element, you are expected to teach yourself the neccessary skills for whatever you choose to do - this I think is particularly good, and something that really distinguishes this course.
- This is without a doubt the most useful and enjoyable course I have sat over my 4 years at University. It forces you to put your skills to application in a practical team environment, very similar to a workplace. I learned considerably more with this than I did with SDP. I can't recommend it enough.
